Building a robotic car at the Intel  
Innovator Conference

*2016: Our Year As  
Movers & Makers!  
With Love,  
the Nguyen  
Richardson Family*

# 1 Save the Water Pipes!

This year we built an Internet of Things project called “Save the Water Pipes!” This is an automated faucet dripper to prevent pipes from freezing in the winter.

We entered our project in an Intel-sponsored contest, and they flew us to China to compete!

Our team: Vui, Eric, and Crystal

# 2 Visiting China

Intel took us to see sights like the Great Wall of China

Vui and Eric sweat at the Temple of Heaven

Vui presents “Save the Water Pipes!” to an Intel VP and a guy from the US State Department

Our team placed 11<sup>th</sup> out of 64 teams at the competition. Pretty good considering that we don't speak Chinese!

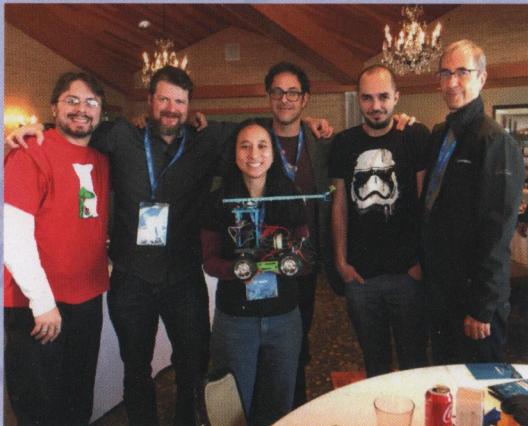

### 3 Vui: Intel Innovator

Because of her work on Save the Water Pipes!, Intel made Vui an Intel Innovator

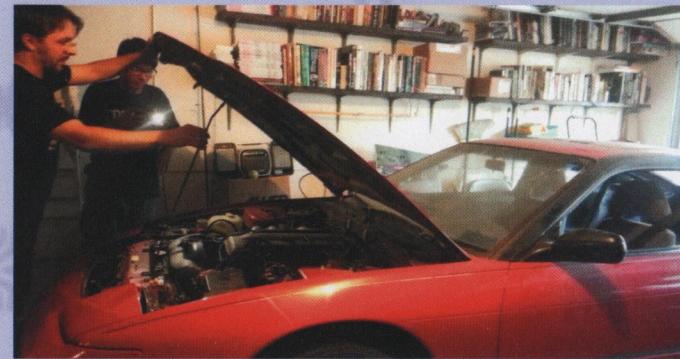

Vui presenting on Save the Water Pipes! at the Intel Innovator Conference

The conference had Innovators from all over the world. Eric went to the conference with Vui and helped her team build their robotic car.

Vui's team of foreigners and assorted malcontents

### 4 A Project Long in the Making

Eric has been promising to get his old Nissan 240SX running for years. This summer, Eric and his nephew Dominic finally made that happen!

Eric drives his 240SX for the first time in eight years

## Something Old

This year we celebrated one year of volunteering at Foothills Animal Shelter. We are finally getting better at bunny-handling!

Eric attempts to cheer up Jeremy. The shelter treated Jeremy for kennel cough. He's all better now, and in a happy home!

6

## Something New

We finally started riding our bikes this year! We rode trails all around the Denver area. Here we are with our friend Pam after a ride.

Vui's first catfish, which was tiny like her. She let it go with a warning.

2016 was a year filled with love, laughs, and adventures. We are grateful for our many blessings!

With Love, Vui and Eric
